Evaluating Learning Algorithms: A Classification Perspective

Nathalie Japkowicz, Mohak Shah

Evaluating Learning Algorithms: A Classification Perspective Nathalie Japkowicz, Mohak Shah
The field of machine learning has matured to the point where many sophisticated learning approaches can be applied to practical applications. Thus it is of critical importance that researchers have the proper tools to evaluate learning approaches and understand the underlying issues. This book examines various aspects of the evaluation process with an emphasis on classification algorithms. The authors describe several techniques for classifier performance assessment, error estimation and resampling, obtaining statistical significance as well as selecting appropriate domains for evaluation. They also present a unified evaluation framework and highlight how different components of evaluation are both significantly interrelated and interdependent. The techniques presented in the book are illustrated using R and WEKA, facilitating better practical insight as well as implementation. Aimed at researchers in the theory and applications of machine learning, this book offers a solid basis for conducting performance evaluations of algorithms in practical settings.

From reader reviews:

Marie Flynt:

Typically the book Evaluating Learning Algorithms: A Classification Perspective will bring one to the new experience of reading a book. The author style to explain the idea is very unique. When you try to find new book to see, this book very suitable to you. The book Evaluating Learning Algorithms: A Classification Perspective is much recommended to you to see. You can also get the e-book from the official web site, so you can more readily to read the book.

Donald Davisson:

The guide with title Evaluating Learning Algorithms: A Classification Perspective has a lot of information that you can learn it. You can get a lot of benefit after read this book. This kind of book exist new know-how the information that exist in this book represented the condition of the world at this point. That is important to yo7u to find out how the improvement of the world. That book will bring you within new era of the the positive effect. You can read the e-book in your smart phone, so you can read the idea anywhere you want.

Michelle Han:

In this age globalization it is important to someone to get information. The information will make a professional understand the condition of the world. The condition of the world makes the information much easier to share. You can find a lot of sources to get information example: internet, magazine, book, and soon. You can see that now, a lot of publisher that print many kinds of book. The particular book that recommended to your account is Evaluating Learning Algorithms: A Classification Perspective this reserve consist a lot of the information from the condition of this world now. This specific book was represented how does the world has grown up. The dialect styles that writer require to explain it is easy to understand. The particular writer made some study when he makes this book. That's why this book acceptable all of you.

Daniel Scholz:

Publication is one of source of know-how. We can add our knowledge from it. Not only for students but additionally native or citizen need book to know the up-date information of year to year. As we know those ebooks have many advantages. Beside we all add our knowledge, could also bring us to around the world. From the book Evaluating Learning Algorithms: A Classification Perspective we can get more advantage. Don't someone to be creative people? To become creative person must prefer to read a book. Just choose the best book that appropriate with your aim. Don't become doubt to change your life with that book Evaluating Learning Algorithms: A Classification Perspective. You can more appealing than now.
