Histology Protocols (Methods in Molecular Biology)

Histology Protocols (Methods in Molecular Biology)

So much of what we know about the pathogenesis of human disease has come from the systematic and careful study of histological material. Indeed, every internal medicine discipline has its landmark papers describing the clinico-pathological correlations. However, increasingly, it is molecular and cellular biology that provides the necessary mechanistic insights. For many years, it was thought that the two skill sets were mutually exclusive, but we hope that this book shows that this is not necessarily so.

Implicit in the science of histology is the preservation and archiving of tissue. Part I of the book concentrates on the preparation of tissue, providing an overview of fixation, embedding, and processing (Chapter 1), and in Chapters 2 and 3, the required techniques for the retrieval of RNA from histological sections. Both routine and specialist histological staining techniques are provided in Part II. These include protocols for immunohistochemistry (Chapters 4–7), lectin (Chapter 8), and hybridization (Chapter 9) histochemistry, histological staining (Chapters 10 and 11), as well as specific methods for the in situ identification of hypoxia (Chapter 12) and apoptosis (Chapter 13). Finally, Part III details advances in imaging (Chapters 14–16) and image analysis (Chapter 17). It is hoped that this volume will provide molecular biologists with the basic histochemical techniques and histologists with the molecular techniques to realise the potential of their resource. We are indebted to the authors for their generosity in sharing these protocols.

From reader reviews:

James Brecht:

What do you concentrate on book? It is just for students since they're still students or this for all people in the world, exactly what the best subject for that? Just you can be answered for that query above. Every person has distinct personality and hobby for each and every other. Don't to be forced someone or something that they don't wish do that. You must know how great along with important the book Histology Protocols (Methods in Molecular Biology). All type of book are you able to see on many options. You can look for the internet resources or other social media.

Brandon Li:

The publication with title Histology Protocols (Methods in Molecular Biology) has lot of information that you can study it. You can get a lot of gain after read this book. That book exist new know-how the information that exist in this reserve represented the condition of the world today. That is important to yo7u to understand how the improvement of the world. That book will bring you in new era of the internationalization. You can read the e-book in your smart phone, so you can read that anywhere you want.

Douglas Whatley:

Reading can called brain hangout, why? Because while you are reading a book specifically book entitled Histology Protocols (Methods in Molecular Biology) your head will drift away trough every dimension, wandering in every aspect that maybe unfamiliar for but surely might be your mind friends. Imaging every word written in a publication then become one web form conclusion and explanation that will maybe you never get previous to. The Histology Protocols (Methods in Molecular Biology) giving you yet another experience more than blown away your head but also giving you useful facts for your better life on this era. So now let us show you the relaxing pattern this is your body and mind is going to be pleased when you are finished examining it, like winning a casino game. Do you want to try this extraordinary paying spare time activity?

Matthew Gregg:

Are you kind of hectic person, only have 10 or perhaps 15 minute in your day time to upgrading your mind talent or thinking skill perhaps analytical thinking? Then you are experiencing problem with the book as compared to can satisfy your short space of time to read it because all of this time you only find book that need more time to be examine. Histology Protocols (Methods in Molecular Biology) can be your answer since it can be read by you who have those short free time problems.
