Neural Network Design (2nd Edition) Martin T Hagan, Howard B Demuth, Mark H Beale, Orlando De Jesús

This book, by the authors of the Neural Network Toolbox for MATLAB, provides a clear and detailed coverage of fundamental neural network architectures and learning rules. In it, the authors emphasize a coherent presentation of the principal neural networks, methods for training them and their applications to practical problems. Features Extensive coverage of training methods for both feedforward networks (including multilayer and radial basis networks) and recurrent networks. In addition to conjugate gradient and Levenberg-Marquardt variations of the backpropagation algorithm, the text also covers Bayesian regularization and early stopping, which ensure the generalization ability of trained networks. Associative and competitive networks, including feature maps and learning vector quantization, are explained with simple building blocks. A chapter of practical training tips for function approximation, pattern recognition, clustering and prediction, along with five chapters presenting detailed real-world case studies. Detailed examples and numerous solved problems. Slides and comprehensive demonstration software can be downloaded from hagan.okstate.edu/nnd.html.

From reader reviews:

Marie Gambino:

Do you have favorite book? Should you have, what is your favorite's book? Reserve is very important thing for us to understand everything in the world. Each publication has different aim or even goal; it means that e-book has different type. Some people experience enjoy to spend their time and energy to read a book. These are reading whatever they acquire because their hobby is usually reading a book. Consider the person who don't like reading through a book? Sometime, individual feel need book after they found difficult problem or exercise. Well, probably you'll have this Neural Network Design (2nd Edition).

Teresa Hennessey:

What do you with regards to book? It is not important with you? Or just adding material when you really need something to explain what the ones you have problem? How about your extra time? Or are you busy person? If you don't have spare time to perform others business, it is give you a sense of feeling bored faster. And you have time? What did you do? Every person has many questions above. They should answer that question simply because just their can do that will. It said that about guide. Book is familiar on every person. Yes, it is suitable. Because start from on pre-school until university need that Neural Network Design (2nd Edition) to read.

Selma Lang:

Spent a free a chance to be fun activity to accomplish! A lot of people spent their spare time with their family, or all their friends. Usually they undertaking activity like watching television, planning to beach, or picnic inside the park. They actually doing same thing every week. Do you feel it? Do you want to something different to fill your current free time/ holiday? Might be reading a book may be option to fill your totally free time/ holiday. The first thing you will ask may be what kinds of guide that you should read. If you want to try look for book, may be the publication untitled Neural Network Design (2nd Edition) can be excellent book to read. May be it might be best activity to you.

Minnie Weiner:

Do you have something that you like such as book? The publication lovers usually prefer to opt for book like comic, quick story and the biggest one is novel. Now, why not striving Neural Network Design (2nd Edition) that give your entertainment preference will be satisfied by means of reading this book. Reading habit all over the world can be said as the means for people to know world better then how they react when it comes to the world. It can't be mentioned constantly that reading practice only for the geeky man or woman but for all of you who wants to always be success person. So , for all you who want to start reading through as your good habit, you can pick Neural Network Design (2nd Edition) become your own starter.
