Text Mining for Qualitative Data Analysis in the Social Sciences: A Study on Democratic Discourse in Germany (Kritische Studien zur Demokratie) Gregor Wiedemann

Gregor Wiedemann evaluates text mining applications for social science studies with respect to conceptual integration of consciously selected methods, systematic optimization of algorithms and workflows, and methodological reflections relating to empirical research. In an exemplary study, he introduces workflows to analyze a corpus of around 600,000 newspaper articles on the subject of "democratic demarcation" in Germany. He provides a valuable resource for innovative measures to social scientists and computer scientists in the field of applied natural language processing.

Virginia Hause:

As a student exactly feel bored in order to reading. If their teacher questioned them to go to the library as well as to make summary for some guide, they are complained. Just tiny students that has reading's soul or real their hobby. They just do what the instructor want, like asked to go to the library. They go to right now there but nothing reading seriously. Any students feel that reading is not important, boring and can't see colorful images on there. Yeah, it is to be complicated. Book is very important in your case. As we know that on this time, many ways to get whatever we want. Likewise word says, ways to reach Chinese's country. So , this Text Mining for Qualitative Data Analysis in the Social Sciences: A Study on Democratic Discourse in Germany (Kritische Studien zur Demokratie) can make you sense more interested to read.
