G. M. Bernstein, M. L. Fischer, and P. L. Richards Department of Physics, University of California Berkeley, California 94720, U. S. A. J. B. Peterson Department of Physics, Princeton University Princeton, New Jersey 08540, U. S. A. T. Timusk Department of Physics, McMaster University Hamilton, Ontario L8S 4M1 , Canada ABSTRACT. Recent measurements of the diffuse background at millimeter wavelengths indicate no departure from a Planck spectrum near the peak of the blackbody curve. Anisotropy measurements indicate no structure, at the 2% level, in the recently detected submillimeter excess. We report here the results of an April 1987 balloon flight of an instrument designed to measure the spectrum of the cosmic background radiation from 1 mm to 3 mm. A description of the instrument can be found in Peterson, Richards, and Timusk (1985). Modifications were made to the apparatus and experimental procedure in order to identify and reduce systematic errors. Results from the latest flight indicate that two effects hamper the interpretation of the data. These systematic effects will be described in detail in a forthcoming publications; they are probably responsible for the non-Planckian spectrum measured by Woody and Richards (1981). Attempts to remove the systematic effects from our data yield the upper limits to the CBR brightness temperature in 4 bands from 1 mm to 3 mm. There is no evidence for an excess of radiation near the 2.8 K blackbody peak.

From reader reviews:

Connie King:

Nowadays reading books be a little more than want or need but also be a life style. This reading practice give you lot of advantages. The advantages you got of course the knowledge your information inside the book in which improve your knowledge and information. The details you get based on what kind of book you read, if you want have more knowledge just go with training books but if you want really feel happy read one with theme for entertaining including comic or novel. Often the Submillimetre Astronomy: Proceedings of the Kona Symposium on Millimeter and Submillimetre Astronomy, Held at Kona, Hawaii, October 3-6, 1988 (Astrophysics and Space Science Library) is kind of book which is giving the reader erratic experience.

Bridgett Killion:

The book with title Submillimetre Astronomy: Proceedings of the Kona Symposium on Millimeter and Submillimetre Astronomy, Held at Kona, Hawaii, October 3-6, 1988 (Astrophysics and Space Science Library) has a lot of information that you can learn it. You can get a lot of help after read this book. This kind of book exist new expertise the information that exist in this e-book represented the condition of the world now. That is important to yo7u to understand how the improvement of the world. This kind of book will bring you inside new era of the the positive effect. You can read the e-book on your smart phone, so you can read it anywhere you want.

Steven Hackett:

A lot of people always spent their free time to vacation or maybe go to the outside with them family or their friend. Do you realize? Many a lot of people spent many people free time just watching TV, as well as playing video games all day long. In order to try to find a new activity here is look different you can read any book. It is really fun for you. If you enjoy the book which you read you can spent all day long to reading a publication. The book Submillimetre Astronomy: Proceedings of the Kona Symposium on Millimeter and Submillimetre Astronomy, Held at Kona, Hawaii, October 3-6, 1988 (Astrophysics and Space Science Library) it is very good to read. There are a lot of those who recommended this book. We were holding enjoying reading this book. In case you did not have enough space to develop this book you can buy typically the e-book. You can m0ore effortlessly to read this book through your smart phone. The price is not to cover but this book offers high quality.

Chelsie Salls:

The book untitled Submillimetre Astronomy: Proceedings of the Kona Symposium on Millimeter and Submillimetre Astronomy, Held at Kona, Hawaii, October 3-6, 1988 (Astrophysics and Space Science Library) contain a lot of information on the idea. The writer explains your ex idea with easy method. The language is very simple to implement all the people, so do not worry, you can easy to read that. The book

was published by famous author. The author will bring you in the new period of time of literary works. You can read this book because you can read on your smart phone, or model, so you can read the book within anywhere and anytime. In a situation you wish to purchase the e-book, you can open up their official website along with order it. Have a nice examine.
