Brajesh Kumar Kaushik, Manoj Kumar Majumder

Carbon Nanotube Based VLSI Interconnects: Analysis and Design (SpringerBriefs in Applied Sciences and Technology) Brajesh Kumar Kaushik, Manoj Kumar Majumder

The brief primarily focuses on the performance analysis of CNT based interconnects in current research scenario. Different CNT structures are modeled on the basis of transmission line theory. Performance comparison for different CNT structures illustrates that CNTs are more promising than Cu or other materials used in global VLSI interconnects. The brief is organized into five chapters which mainly discuss: (1) an overview of current research scenario and basics of interconnects; (2) unique crystal structures and the basics of physical properties of CNTs, and the production, purification and applications of CNTs; (3) a brief technical review, the geometry and equivalent RLC parameters for different single and bundled CNT structures; (4) a comparative analysis of crosstalk and delay for different single and bundled CNT structures; and (5) various unique mixed CNT bundle structures and their equivalent electrical models.

From reader reviews:

Ernest Pettaway:

Exactly why? Because this Carbon Nanotube Based VLSI Interconnects: Analysis and Design (SpringerBriefs in Applied Sciences and Technology) is an unordinary book that the inside of the book waiting for you to snap this but latter it will surprise you with the secret this inside. Reading this book next to it was fantastic author who write the book in such remarkable way makes the content on the inside easier to understand, entertaining technique but still convey the meaning totally. So , it is good for you for not hesitating having this any longer or you going to regret it. This phenomenal book will give you a lot of positive aspects than the other book have got such as help improving your skill and your critical thinking way. So , still want to hold up having that book? If I were you I will go to the e-book store hurriedly.

Geneva Orta:

Does one one of the book lovers? If so, do you ever feeling doubt if you are in the book store? Try and pick one book that you never know the inside because don't assess book by its protect may doesn't work here is difficult job because you are afraid that the inside maybe not since fantastic as in the outside search likes. Maybe you answer could be Carbon Nanotube Based VLSI Interconnects: Analysis and Design (SpringerBriefs in Applied Sciences and Technology) why because the amazing cover that make you consider about the content will not disappoint you. The inside or content will be fantastic as the outside as well as cover. Your reading sixth sense will directly guide you to pick up this book.

John Sorrells:

In this period of time globalization it is important to someone to receive information. The information will make professionals understand the condition of the world. The health of the world makes the information simpler to share. You can find a lot of recommendations to get information example: internet, newspapers, book, and soon. You will observe that now, a lot of publisher in which print many kinds of book. The particular book that recommended to your account is Carbon Nanotube Based VLSI Interconnects: Analysis and Design (SpringerBriefs in Applied Sciences and Technology) this reserve consist a lot of the information of the condition of this world now. This specific book was represented just how can the world has grown up. The dialect styles that writer require to explain it is easy to understand. The actual writer made some research when he makes this book. Honestly, that is why this book acceptable all of you.

Carrie Francis:

Reading a book make you to get more knowledge as a result. You can take knowledge and information from the book. Book is prepared or printed or outlined from each source that filled update of news. Within this modern era like today, many ways to get information are available for you. From media social similar to newspaper, magazines, science guide, encyclopedia, reference book, novel and comic. You can add your

knowledge by that book. Isn't it time to spend your spare time to spread out your book? Or just searching for the Carbon Nanotube Based VLSI Interconnects: Analysis and Design (SpringerBriefs in Applied Sciences and Technology) when you essential it?
