This extensively researched book argues that the development of a libertarian culture was an indispensable component of the rise of the West. The roots of the West's superior intellectual and artistic creativity should be traced back to the aristocratic warlike culture of Indo-European speakers. Among the many fascinating topics discussed are: the ascendancy of multicultural historians and the degradation of European history; China's ecological endowments and imperial windfalls; military revolutions in Europe 1300-1800; the science and chivalry of Henry the Navigator; Judaism and its contribution to Western rationalism; the cultural richness of Max Weber versus the intellectual poverty of Pomeranz, Wong, Goldstone, Goody, and A.G. Frank; change without progress in the East; Hegel's Phenomenology of the [Western] Spirit; Nietzsche and the education of the Homeric Greeks; Kojève's master-slave dialectic and the Western state of nature; Christian virtues and German aristocratic expansionism.
