**m-Health: Fundamentals and Applications (IEEE Press Series on Biomedical Engineering)** Robert S. H. Istepanian, Bryan Woodward

**Addresses recent advances from both the clinical and technological perspectives to provide a comprehensive presentation of m-Health**

This book introduces the concept of m-Health, first coined by Robert S. H. Istepanian in 2003. The evolution of m-Health since then—how it was transformed from an academic concept to a global healthcare technology phenomenon—is discussed. Afterwards the authors describe in detail the basics of the three enabling scientific technological elements of m-Health (sensors, computing, and communications), and how each of these key ingredients has evolved and matured over the last decade. The book concludes with detailed discussion of the future of m-Health and presents future directions to potentially shape and transform healthcare services in the coming decades. In addition, this book:

- Discusses the rapid evolution of m-Health in parallel with the maturing process of its enabling technologies, from bio-wearable sensors to the wireless and mobile communication technologies from IOT to 5G systems and beyond
- Includes clinical examples and current studies, particularly in acute and chronic disease management, to illustrate some of the relevant medical aspects and clinical applications of m-Health
- Describes current m-Health ecosystems and business models
- Covers successful applications and deployment examples of m-Health in various global health settings, particularly in developing countries

**From reader reviews:**

**Harvey Hobbs:**

Why don't make it to be your habit? Right now, try to prepare your time to do the important behave, like looking for your favorite reserve and reading a publication. Beside you can solve your problem; you can add your knowledge by the e-book entitled m-Health: Fundamentals and Applications (IEEE Press Series on Biomedical Engineering). Try to face the book m-Health: Fundamentals and Applications (IEEE Press Series on Biomedical Engineering) as your pal. It means that it can for being your friend when you really feel alone and beside that of course make you smarter than previously. Yeah, it is very fortunated in your case. The book makes you a lot more confidence because you can know every little thing by the book. So , we should make new experience as well as knowledge with this book.

**Carol Boissonneault:**

In this 21st millennium, people become competitive in each and every way. By being competitive at this point, people have do something to make all of them survives, being in the middle of often the crowded place and notice through surrounding. One thing that occasionally many people have underestimated the idea for a while is reading. Sure, by reading a book your ability to survive increase then having chance to remain than other is high. For yourself who want to start reading a book, we give you that m-Health: Fundamentals and Applications (IEEE Press Series on Biomedical Engineering) book as nice and daily reading publication. Why, because this book is greater than just a book.

**Albert Guerra:**

Your reading 6th sense will not betray an individual, why because this m-Health: Fundamentals and Applications (IEEE Press Series on Biomedical Engineering) e-book written by well-known writer whose to say well how to make book which can be understand by anyone who all read the book. Written with good manner for you, leaking every ideas and composing skill only for eliminate your hunger then you still uncertainty m-Health: Fundamentals and Applications (IEEE Press Series on Biomedical Engineering) as good book not just by the cover but also from the content. This is one e-book that can break don't assess book by its handle, so do you still needing yet another sixth sense to pick this!? Oh come on your reading sixth sense already alerted you so why you have to listening to a different sixth sense.

**Ronald Malone:**

As a university student exactly feel bored to reading. If their teacher inquired them to go to the library or to make summary for some e-book, they are complained. Just very little students that has reading's heart or real their leisure activity. They just do what the educator want, like asked to go to the library. They go to presently there but nothing reading significantly. Any students feel that reading through is not important, boring and can't see colorful photographs on there. Yeah, it is being complicated. Book is very important to suit your needs. As we know that on this age, many ways to get whatever we wish. Likewise word says,

many ways to reach Chinese's country. Therefore this m-Health: Fundamentals and Applications (IEEE Press Series on Biomedical Engineering) can make you sense more interested to read.
