## **Nature's Portraits: A Coloring Book of Scales, Tails, Furs, and Wings** Peggy Macnamara

When it comes to color, nothing can surpass the vast palette found in nature, from a bright green leaf in a sun-dappled forest to the rich red feathers of a cardinal and the muted greens, ambers, and browns that make up the shell of a tortoise. Wildlife artist Peggy Macnamara has been recreating the natural world through her drawings and paintings for decades, and, with *Nature's Portraits*, she invites the rest of the world to join her.

*Nature's Portraits* offers sixty of Macnamara's detailed drawings that can be brought brilliantly to life with nothing more than a few colored pencils or crayons and a sense of wonder about the world around us. Many of the drawings depict animals as they might appear in their natural habitats—like a tree frog, a dashing, playful fox, a snowy owl poised for flight, a sauntering jaguar, and a watchful herd of giraffe. These wild furry and feathered friends are joined by animals found in museums, including Sue, the Field Museum's resident Tyrannosaurus rex. Each illustration is captioned with a brief scientific description of the species pictured.

Combining inspiration from natural history with a calming, creative activity, *Nature's Portraits* encourages us to take a closer look at what we miss when we don't take the time to stop and look with deep appreciation at the bounty of the natural world around us.
