Well Test Analysis (Prentice Hall Petroleum Engineering) Rajagopal Raghavan

Presenting a detailed account of responses in wells producing fluids (hydrocarbons, water/steam) from subterranean porous formations, this reference documents the foundations of the theories forming the basis of procedures for estimating the properties of underground reservoirs. It aims to explain the underlying assumptions of well test analysis in an easy-to-apply, coherent fashion. The book covers conservation principles, differential equations for flow through porous media, pressure build-up analysis, gas well analysis and convolution, and contains a variety of simple to follow mathematical expressions, drawings, tables and photographs.
