## **Defensive (anti-herbivory) Coloration in Land Plants** Simcha Lev-Yadun

This book presents visual plant defenses (camouflage, mimicry and aposematism via coloration, morphology and even movement) against herbivores. It is mainly an ideological monograph, a manifesto representing my current understanding on defensive plant coloration and related issues. The book is not the final word in anything, but rather the beginning of many things. It aims to establish visual anti-herbivory defense as an integral organ of botany, or plant science as it is commonly called today. I think that like in animals, many types of plant coloration can be explained by selection associated with the sensory/cognitive systems of herbivores and predators to reduce herbivory. It is intended to intrigue and stimulate students of botany/plant science and plant/animal interactions for a very long time. This book is tailored to a readership of biologists and naturalists of all kinds and levels, and more specifically for botanists, ecologists, evolutionists and to those interested in plant/animal interactions. It is written from the point of view of a naturalist, ecologist and evolutionary biologist that I hold, considering natural selection as the main although not the only drive for evolution. According to this perspective, factors such as chance, founder effects, genetic drift and various stochastic processes that may and do influence characters found in specific genotypes, are not comparable in their power and influence to the common outcomes of natural selection, especially manifested when very many species belonging to different plant families, with very different and separate evolutionary histories, arrive at the same adaptation, something that characterizes many of the visual patterns and proposed adaptations described and discussed in this book. Many of the discussed visual defensive mechanisms are aimed at operating before the plants are damaged, i.e., to be their first line of defense. In this respect, I think that the name of the book by Ruxton et al. (2004) "Avoiding Attack" is an excellent phrase for the assembly of the best types of defensive tactics. While discussing anti-herbivory, I do remember, study and teach physiological/developmental aspects of some of the discussed coloration patterns, and I am fully aware of the simultaneous and diverse functions of many plant characters in addition to defense.

### **From reader reviews:**

#### **Jodie Long:**

Have you spare time for the day? What do you do when you have much more or little spare time? Sure, you can choose the suitable activity to get spend your time. Any person spent all their spare time to take a stroll, shopping, or went to often the Mall. How about open or maybe read a book eligible Defensive (anti-herbivory) Coloration in Land Plants? Maybe it is to become best activity for you. You already know beside you can spend your time using your favorite's book, you can smarter than before. Do you agree with their opinion or you have some other opinion?

#### **Allen Reilley:**

Information is provisions for those to get better life, information nowadays can get by anyone on everywhere. The information can be a expertise or any news even an issue. What people must be consider if those information which is inside former life are difficult to be find than now's taking seriously which one works to believe or which one the actual resource are convinced. If you get the unstable resource then you buy it as your main information you will see huge disadvantage for you. All those possibilities will not happen in you if you take Defensive (anti-herbivory) Coloration in Land Plants as your daily resource information.

#### **Jennifer Mitchell:**

Playing with family in a very park, coming to see the marine world or hanging out with friends is thing that usually you have done when you have spare time, and then why you don't try factor that really opposite from that. A single activity that make you not sense tired but still relaxing, trilling like on roller coaster you already been ride on and with addition associated with. Even you love Defensive (anti-herbivory) Coloration in Land Plants, you could enjoy both. It is very good combination right, you still desire to miss it? What kind of hangout type is it? Oh seriously its mind hangout men. What? Still don't have it, oh come on its called reading friends.

#### **Larisa Nagle:**

In this time globalization it is important to someone to receive information. The information will make someone to understand the condition of the world. The fitness of the world makes the information much easier to share. You can find a lot of sources to get information example: internet, classifieds, book, and soon. You can observe that now, a lot of publisher in which print many kinds of book. The actual book that recommended for you is Defensive (anti-herbivory) Coloration in Land Plants this publication consist a lot of the information in the condition of this world now. This kind of book was represented just how can the world has grown up. The words styles that writer use for explain it is easy to understand. The particular writer made some study when he makes this book. That is why this book ideal all of you.
