Cities That Think like Planets: Complexity, Resilience, and Innovation in Hybrid Ecosystems Marina Alberti

As human activity and environmental change come to be increasingly recognized as intertwined phenomena on a rapidly urbanizing planet, the field of urban ecology has risen to offer useful ways of thinking about coupled human and natural systems.

On the forefront of this discipline is Marina Alberti, whose innovative work offers a conceptual framework for uncovering fundamental laws that govern the complexity and resilience of cities, which she sees as key to understanding and responding to planetary change and the evolution of Earth. Bridging the fields of urban planning and ecology, Alberti describes a science of cities that work on a planetary scale and that links unpredictable dynamics to the potential for innovation. It is a science that considers interactions - at all scales - between people and built environments and between cities and their larger environments.

Cities That Think like Planets advances strategies for planning a future that may look very different from the present, as rapid urbanization could tip the Earth toward abrupt and nonlinear change. Alberti's analyses of the various hybrid ecosystems, such as self-organization, heterogeneity, modularity, multiple equilibria, feedback, and transformation, may help humans participate in guiding the Earth away from inadvertent collapse and toward a new era of planetary co-evolution and resilience.

From reader reviews:

Andrea Toliver:

The guide with title Cities That Think like Planets: Complexity, Resilience, and Innovation in Hybrid Ecosystems has a lot of information that you can find out it. You can get a lot of help after read this book. This particular book exist new know-how the information that exist in this guide represented the condition of the world today. That is important to you to know how the improvement of the world. That book will bring you inside new era of the syndication. You can read the e-book on your own smart phone, so you can read the idea anywhere you want.

Jack Lumpkin:

Do you have something that you enjoy such as book? The publication lovers usually prefer to select book like comic, small story and the biggest the first is novel. Now, why not trying Cities That Think like Planets: Complexity, Resilience, and Innovation in Hybrid Ecosystems that give your enjoyment preference will be satisfied by reading this book. Reading habit all over the world can be said as the opportunity for people to know world considerably better then how they react toward the world. It can't be mentioned constantly that reading habit only for the geeky individual but for all of you who wants to end up being success person. So , for all you who want to start studying as your good habit, you are able to pick Cities That Think like Planets: Complexity, Resilience, and Innovation in Hybrid Ecosystems become your current starter.

Ruth Mullins:

Beside this Cities That Think like Planets: Complexity, Resilience, and Innovation in Hybrid Ecosystems in your phone, it could possibly give you a way to get closer to the new knowledge or information. The information and the knowledge you are going to got here is fresh through the oven so don't possibly be worry if you feel like an outdated people live in narrow small town. It is good thing to have Cities That Think like Planets: Complexity, Resilience, and Innovation in Hybrid Ecosystems because this book offers for your requirements readable information. Do you occasionally have book but you rarely get what it's all about. Oh come on, that will not happen if you have this inside your hand. The Enjoyable agreement here cannot be questionable, including treasuring beautiful island. So do you still want to miss the idea? Find this book along with read it from right now!

Brianna Bell:

Don't be worry should you be afraid that this book will filled the space in your house, you may have it in e-book way, more simple and reachable. This Cities That Think like Planets: Complexity, Resilience, and Innovation in Hybrid Ecosystems can give you a lot of close friends because by you investigating this one book you have issue that they don't and make anyone more like an interesting person. This kind of book can be one of one step for you to get success. This reserve offer you information that probably your friend doesn't understand, by knowing more than other make you to be great individuals. So , why hesitate? We

should have Cities That Think like Planets: Complexity, Resilience, and Innovation in Hybrid Ecosystems.
