**Geomorphic Analysis of River Systems: An Approach to Reading the Landscape** Kirstie A. Fryirs, Gary J. Brierley

**Filling a niche in the geomorphology teaching market, this introductory book is built around a 12 week course in fluvial geomorphology.**

‘Reading the landscape’ entails making sense of what a riverscape looks like, how it works, how it has evolved over time, and how alterations to one part of a catchment may have secondary consequences elsewhere, over different timeframes. These place-based field analyses are framed within their topographic, climatic and environmental context. Issues and principles presented in the first part of this book provide foundational understandings that underpin the approach to reading the landscape that is presented in the second half of the book. In reading the landscape, detective-style investigations and interpretations are tied to theoretical and conceptual principles to generate catchment-specific analyses of river character, behaviour and evolution, including responses to human disturbance.

This book has been constructed as an introductory text on river landscapes, providing a bridge and/or companion to quantitatively-framed or modelled approaches to landscape analysis that are addressed elsewhere. Key principles outlined in the book emphasise the importance of complexity, contingency and emergence in interpreting the character, behaviour and evolution of any given system.

The target audience is second and third year undergraduate students in geomorphology, hydrology, earth science and environmental science, as well as river practitioners who use geomorphic understandings to guide scientific and/or management applications.

The primary focus of Kirstie and Gary’s research and teaching entails the use of geomorphic principles as a tool with which to develop coherent scientific understandings of river systems, and the application of these understandings in management practice. Kirstie and Gary are co-developers of the River Styles® Framework and Short Course that is widely used in river management, decision-making and training.

### **From reader reviews:**

#### **Danny Nehring:**

This Geomorphic Analysis of River Systems: An Approach to Reading the Landscape tend to be reliable for you who want to be described as a successful person, why. The main reason of this Geomorphic Analysis of River Systems: An Approach to Reading the Landscape can be one of many great books you must have is giving you more than just simple studying food but feed a person with information that might be will shock your before knowledge. This book is definitely handy, you can bring it almost everywhere and whenever your conditions throughout the e-book and printed kinds. Beside that this Geomorphic Analysis of River Systems: An Approach to Reading the Landscape giving you an enormous of experience including rich vocabulary, giving you trial run of critical thinking that we all know it useful in your day task. So , let's have it appreciate reading.

#### **Gary Lopez:**

The actual book Geomorphic Analysis of River Systems: An Approach to Reading the Landscape will bring that you the new experience of reading a book. The author style to explain the idea is very unique. In case you try to find new book to learn, this book very acceptable to you. The book Geomorphic Analysis of River Systems: An Approach to Reading the Landscape is much recommended to you to learn. You can also get the e-book through the official web site, so you can more readily to read the book.

#### **Peggy Dunn:**

Often the book Geomorphic Analysis of River Systems: An Approach to Reading the Landscape has a lot of information on it. So when you read this book you can get a lot of advantage. The book was published by the very famous author. The writer makes some research before write this book. This kind of book very easy to read you may get the point easily after perusing this book.

#### **John Negron:**

That e-book can make you to feel relax. This book Geomorphic Analysis of River Systems: An Approach to Reading the Landscape was vibrant and of course has pictures on the website. As we know that book Geomorphic Analysis of River Systems: An Approach to Reading the Landscape has many kinds or style. Start from kids until adolescents. For example Naruto or Investigator Conan you can read and believe you are the character on there. So , not at all of book are generally make you bored, any it offers you feel happy, fun and chill out. Try to choose the best book for you personally and try to like reading which.
