Holt McDougal Science Fusion Florida: Assessment Guide Grade 7 HOLT MCDOUGAL

Written for today's learners, Science Fusion offers students the opportunity to ask and answer questions, investigate and draw conclusions through textbook reading, digital lessons, and virtual labs. It's truly a course that will appeal to all types of learners. The comprehensive, secular worktexts cover all pertinent topics in the areas of life science, earth science, and physical science for the K-5 grade levels with separate modules available for grades 6-8. Units within each book are divided into lessons which are done weekly. These workbooks are colorful and inviting for students and all information is included right at the student's fingertips on perforated pages. Each lesson begins with an Essential Question which encourages the student to search for the answer in their reading, and/or Engage your Brain activities which include a prediction activity. Active Reading, Visualize It, and Do the Math activities guide the student through the lesson, and Lesson Review activities aid in comprehension, application, and reasoning skills, and a unit review concludes each unit. At grades 6-8, the curriculum is divided into modules which can be used at any time during those grades. You will want to choose either 3 or 4 of the modules to do each year, and they can be done in any order. There are an odd number of modules, so you may choose not to do them all. Labs are included in the books with demonstrations in the video lessons, but you may not be able to get your hands on all of the materials needed to do the labs personally. The kindergarten level is the only book that doesn't follow the same format as the others. It is in a horizontal format with large, bright photographs and illustrations and students draw their responses. This level works well for non-writers.
