Shaoguang Zhang

The Chemistry of Zirconacycles and 2,6-Diazasemibullvalenes: Synthesis, Structures, Reactions, and Applications in the Synthesis of Novel N-Heterocycles (Springer Theses) Shaoguang Zhang

In this thesis, the author introduces two strategies used to construct various types of N-heterocycles, based on the chemistry of zirconacycles and 2,6-diazasemibullvalenes. In the first part, the author presents the development of multi-component cyclization of a zirconacyclobutene-silacyclobutene fused compound, nitriles and unsaturated compounds. These reactions provide synthetically useful methodology for various N-heterocycles such as 3-acyl pyrrole, pyrrolo[3,2-d]pyridazine and dihydropyrroloazepine, which are all difficult to synthesize by other means. The isolation and characterization of the key three-fused-ring Zr/Si-containing intermediates are also described in detail. These results show that the zirconacyclobutene-silacyclobutene fused compound behaves as a “chemical transformer” upon treatment with various substrates via the “coordination-induced skeleton rearrangement” mechanism. In the second part, the author demonstrates the synthesis and isolation of a series of 2,6-diazasemibullvalenes (NSBVs) from the reaction of 1,4-dithio-1,3-dienes and nitriles, highlighting the significant progress made for the first time in this work: (1) determination of X-ray crystal structure of a substituted 2,6-diazasemibullvalene; (2) measurement of the activation barrier of its rapid intramolecular aza-Cope rearrangement in solution; (3) exploration of several reaction types of NSBV with diverse ring-expansion products and “bowl-shape” or “cage-shape” N-containing polycyclic skeletons; (4) demonstration of the localized structure as the predominant form and the homoaromatic delocalized structure as a minor component in the equilibrium using theoretical analysis. Based on well-founded results, this work sheds new light on this controversial topic.

From reader reviews:

Emil Townsend:

The book *The Chemistry of Zirconacycles and 2,6-Diazasemibullvalenes: Synthesis, Structures, Reactions, and Applications in the Synthesis of Novel N-Heterocycles (Springer Theses)* make one feel enjoy for your spare time. You may use to make your capable much more increase. Book can to become your best friend when you getting pressure or having big problem together with your subject. If you can make reading through a book *The Chemistry of Zirconacycles and 2,6-Diazasemibullvalenes: Synthesis, Structures, Reactions, and Applications in the Synthesis of Novel N-Heterocycles (Springer Theses)* for being your habit, you can get much more advantages, like add your current capable, increase your knowledge about many or all subjects. You may know everything if you like wide open and read a e-book *The Chemistry of Zirconacycles and 2,6-Diazasemibullvalenes: Synthesis, Structures, Reactions, and Applications in the Synthesis of Novel N-Heterocycles (Springer Theses)*. Kinds of book are a lot of. It means that, science publication or encyclopedia or some others. So , how do you think about this publication?

Thomas Woods:

This *The Chemistry of Zirconacycles and 2,6-Diazasemibullvalenes: Synthesis, Structures, Reactions, and Applications in the Synthesis of Novel N-Heterocycles (Springer Theses)* book is not really ordinary book, you have it then the world is in your hands. The benefit you obtain by reading this book is definitely information inside this book incredible fresh, you will get information which is getting deeper anyone read a lot of information you will get. That *The Chemistry of Zirconacycles and 2,6-Diazasemibullvalenes: Synthesis, Structures, Reactions, and Applications in the Synthesis of Novel N-Heterocycles (Springer Theses)* without we know teach the one who looking at it become critical in thinking and analyzing. Don't become worry *The Chemistry of Zirconacycles and 2,6-Diazasemibullvalenes: Synthesis, Structures, Reactions, and Applications in the Synthesis of Novel N-Heterocycles (Springer Theses)* can bring whenever you are and not make your handbag space or bookshelves' become full because you can have it within your lovely laptop even cellphone. This *The Chemistry of Zirconacycles and 2,6-Diazasemibullvalenes: Synthesis, Structures, Reactions, and Applications in the Synthesis of Novel N-Heterocycles (Springer Theses)* having very good arrangement in word and layout, so you will not feel uninterested in reading.

Jessica Keith:

Nowadays reading books are more than want or need but also get a life style. This reading behavior give you lot of advantages. The advantages you got of course the knowledge even the information inside the book which improve your knowledge and information. The information you get based on what kind of guide you read, if you want attract knowledge just go with training books but if you want experience happy read one having theme for entertaining for example comic or novel. The actual *The Chemistry of Zirconacycles and 2,6-Diazasemibullvalenes: Synthesis, Structures, Reactions, and Applications in the Synthesis of Novel N-Heterocycles (Springer Theses)* is kind of publication which is giving the reader unpredictable experience.

Linda Henderson:

A lot of e-book has printed but it takes a different approach. You can get it by web on social media. You can choose the very best book for you, science, witty, novel, or whatever simply by searching from it. It is called of book *The Chemistry of Zirconacycles and 2,6-Diazasemibullvalenes: Synthesis, Structures, Reactions, and Applications in the Synthesis of Novel N-Heterocycles* (Springer Theses). You'll be able to your knowledge by it. Without departing the printed book, it could add your knowledge and make a person happier to read. It is most significant that, you must aware about publication. It can bring you from one destination to other place.

Download and Read Online *The Chemistry of Zirconacycles and 2,6-Diazasemibullvalenes: Synthesis, Structures, Reactions, and Applications in the Synthesis of Novel N-Heterocycles* (Springer Theses) Shaoguang Zhang #I7Q61F3S4DC

Read The Chemistry of Zirconacycles and 2,6-Diazasemibullvalenes: Synthesis, Structures, Reactions, and Applications in the Synthesis of Novel N-Heterocycles (Springer Theses) by Shaoguang Zhang for online ebook

The Chemistry of Zirconacycles and 2,6-Diazasemibullvalenes: Synthesis, Structures, Reactions, and Applications in the Synthesis of Novel N-Heterocycles (Springer Theses) by Shaoguang Zhang Free PDF download, audio books, books to read, good books to read, cheap books, good books, online books, books online, book reviews epub, read books online, books to read online, online library, greatbooks to read, PDF best books to read, top books to read The Chemistry of Zirconacycles and 2,6-Diazasemibullvalenes: Synthesis, Structures, Reactions, and Applications in the Synthesis of Novel N-Heterocycles (Springer Theses) by Shaoguang Zhang books to read online.
